# Highlights

## Professional filtration system

It filters out harmful agents in multiple stages:

1. The pre-filter treated with antibacterial substances, it catches big particles like human hair.
2. In combination with the HEPA filter, the multi-care filter filters out ultrafine particles larger than 20 nm including some viruses. According to publications of the W.H.O, the avian and human influenza viruses and Legionella bacteria are larger than 20 nm.
3. The AC filter filters out odors and harmful gases effectively.
4. The HEPA filter filters out fine dust and cigarette smoke and eliminates germs and mould with antibacterial coating.

## HealthyAirProtect Alert

HealthyAirProtect Alert warns you timely when you have to replace a new filter. When the filter is not replaced in time, the appliance stops functioning to avoid running with no effect since filter is full.

## HealthyAirProtect Lock

HealthyAirProtect Lock function ensures you healthy air always. It shuts off the purifier when healthy air can no longer be guaranteed. When one of the filters is almost full and has to be cleaned or replaced, the HealthyAirProtect Alert warns you to replace or clean filter. When users do not replace concerned filter, the appliance stops operating and the appliance is locked.

## Sleep Mode

In Sleep mode, the appliance operates very quietly and dimmed lights, to allow you to sleep undisturbed. The appliance switches to lower activity level, the fan speed and noise level are reduced and the energy consumption is minimised. If you want to go back to auto mode or the fan speed mode, simply press the FAN SPEED or AUTO button. The sleep mode is then deactivated. In Sleep mode, all lights are off, except Sleep light and one of the HOUR

lights (but dimmed) if you have activated the timer function.

## 4-step air quality indicators

4-step light indicators clearly show air quality level Blue - Very Good; Deep Purple - Good; Purple - Fair; Red - Bad

## Fully automatic operation

Fully automatic operation ensures hassle-free functioning. The built-in sensor (particle) measures the air quality in the room and automatically selects the appropriate speed setting to guarantee the best possible air quality in your rooms. The multiple color indicators inform you on the actual air quality, and will be red, deep purple and purple if the air quality is not yet good enough, and blue when the air is clean and healthy again.
